DON'T BREAK THE DEAL WITH MICHIGAN'S WORKERS AND BUSINESSES

Investments from the **Bipartisan Infrastructure Law, Inflation Reduction Act**, and the **Broadband Equity, Access, and Deployment** program are powering Michigan's economy – creating jobs, expanding broadband, and rebuilding infrastructure. Cutting just 20% of these programs would eliminate jobs, derail progress on critical projects, and hurt workers, business and the state's economy.

THE COST OF FEDERAL CUTS IN MICHIGAN

JOBS, PAYCHECKS, AND LOCAL GROWTH

ABOUT **$1 BILLION** IN LOST ECONOMIC OUTPUT

AROUND **4,973** JOBS ELIMINATED IN THE FIRST YEAR

Economic output *means wages, income for businesses, the value of materials and services, and taxes generated.* ***Nearly 1 billion lost*** *means lost paychecks, lost business revenue, and fewer dollars flowing through Michigan.*

TOP INDUSTRIES AT RISK

- CONSTRUCTION OF POWER AND COMMUNICATION STRUCTURES
- HIGHWAY AND STREET REPAIR
- ARCHITECTURE, ENGINEERING, AND TELECOMMUNICATIONS SERVICES

In total, **103 INDUSTRIES** will suffer job losses.

PEOPLE AND BUSINESS COUNTING ON INVESTMENTS

- **MID-CAREER WORKERS** – around the age of 44 who've built careers in infrastructure, trades, and telecommunications
- **PEOPLE WITHOUT A COLLEGE DEGREE** who may have gained skills through apprenticeships, certificates, community college courses, or on-the-job training
- **WORKING-CLASS COMMUNITIES IN RURAL AND INDUSTRIAL REGIONS** – the very places counting on infrastructure projects to drive local growth
- **LOCAL BUSINESSES** – including restaurants, retailers, and hospitals that serve these workers

DON'T CUT WHAT'S WORKING

PROTECT JOB-CREATING INVESTMENTS IN MICHIGAN

These investments have already been deployed — creating hundreds of jobs, expanding high-speed internet, and bolstering Michigan's economy. Cutting projects that are already under way **isn't fiscal responsibility**. It would be a **disruptive and costly mistake** that wastes taxpayer money. And it would undo the progress Michigan has made in **good faith** based on a **bipartisan promise** of funding.

THE CHOICE IS CLEAR

WHAT CUTS WOULD DO	WHAT CONGRESS SHOULD DO
Eliminate jobs, stall infrastructure and broadband projects, and hurt workers and local businesses	**Protect job investments** in reconciliation and budget discussions to keep people working and projects moving forward
Add more **economic pain & uncertainty** to working families, small towns, and local economies	**Support workforce policies** that provide stability and connect Michiganders to good jobs in infrastructure and broadband
Undermine bipartisan investments already at work	**Keep your promise** — support the bipartisan funding you helped to pass and stand with the Michigan workers and businesses depending on it
Waste taxpayer dollars already invested in planning and advancing projects	**Ensure a return on investment** by allowing Michigan and its businesses to finish the projects they were funded to do

KEEP MICHIGAN MOVING FORWARD

- Reject cuts to workforce, broadband, and infrastructure programs.
- Protect bipartisan investments that are building Michigan's economy.
- Stand with working people and local businesses.

METHODOLOGY

- This analysis was conducted by the Burning Glass Institute https://www.burningglassinstitute.org/
- This analysis was conducted by estimating a 20% cut from each of the impacted grants and analyzing the impacts by industry through input-output analysis.
- Using Leontief inverse matrices derived from the input-output tables, IMPLAN calculates economic multipliers that measure how an initial change in one industry (like reduced government spending) ripples through the entire economy. The multipliers capture both backward linkages (supplier effects) and forward linkages (customer effects) between industries.
